Evidence lineage: historical results are not current-model results
Historical cue/camera labels
October–early November
Mixed benchmarks; multiple protocols
Existing manuscript tables
Fusion, CNN / trees, LODO
Retain as historical evidence
No direct improvement claim across different cohorts, labels or thresholds
Hand-labelled directory
37 exports → 28 unique sensor pairs
14 have manual-label PPG rows
Freeze sensor + annotation hashes
pinch_in-ae0a22bf manifest
20 train + 8 evaluation IDs
82.46% recorded event recall
0 observed false activations/h
Needed before headline update
Recover event log + exposure
Audit label versions and all tuning
Run a prospective frozen test
Solid boxes: verified repository evidence. Yellow box: proposed verification, not a completed study.
